

EdWebinar: Engaging Early Learners with Technology: Sharing Research and Best Practices

Are you interested in learning about best practices for technology use with young children (birth through age five) and their families, as well as effective technology strategies to support early childhood educators in grades K-3?

Join representatives from Avonworth Primary Center, Trying Together, and Digital Promise on Thursday, April 25 for an edWebinar exploring best practices and strategies grounded in research from NAEYC and Common Sense Media. In addition, presenters will share insights from a roundtable facilitated by Hi5!, a kindergarten readiness and registration campaign in the Greater Pittsburgh Region, which focused on developmentally appropriate technology use across the early childhood continuum.

Participants will receive a CE Certificate for completing the session and will have an opportunity to ask questions.

Event Details:

April 25, 2019
3:00 - 4:00 p.m.

Presented By:

Scott Miller, Ph.D., Principal,
Avonworth Primary Center

Emily Neff, Public Policy
Associate, Trying Together

Hosted By:

Sierra Noakes, Research Project
Manager, Digital Promise
