EVENT #304771

OVERVIEW

Positive racial identity has been linked to a number of encouraging academic outcomes, even in very young children. This PD opportunity will expose directors to strategies that promote positive racial identity in African American children.

OBJECTIVES

Upon completion, the learner will be able to...

1. Describe racial awareness development (i.e., the ages and stages at which children develop an awareness of physical characteristics related to existing social categories of race in America).
2. Display awareness of the role of early educators in supporting children's healthy understanding of race.
3. Illustrate techniques for working with staff and families to integrate conversations and activities that support children's racial awareness and positive racial identity.
