

Exploring the Outdoor World Through Our Senses

The outside world shapes children's development through everyday, hands-on experiences. In this session, participants will explore ways to facilitate sensory experiences in outdoor play including natural materials in the outdoor environment, reusable loose parts, and classroom materials. Participants will discover the benefits of learning through the five senses and explore meaningful ways to encourage sensory learning with young children.

Trainer: Katie Gullone

CKC: K2.4.C2

Keystone STARS Alignment: SQ.3.4.9

CDA Subject Area: Planning a safe and healthy learning environment.

All courses offer PQAS and Act 48 hours.

Free/Three hours

Limited spaces available.
