

# Communities of Practice

December 2020

## Keystone STARS Enrollment Calculation Tool (ECT)

Early Learning Resource Center (ELRC) Region 5 offers Communities of Practice (COP) for early learning professionals to discuss topics of interest, current trends in the field, and offer insight and inspiration to one another. In December, the COP virtual sessions will focus on tips, how-tos, and tools for participants to successfully complete the STARS Enrollment Calculation Tool (ECT). The ECT assists providers in accurately determining enrollment, as a full-time equivalency (FTE), for individual children, classroom sessions, and the provider. It also assists the Office of Child Development and Early Learning (OCDEL) in identifying the number of children impacted by the continuous quality improvement efforts of providers who participate in Keystone STARS. Participants will learn how to use the tool for STARS designation and renewal, making budget projections, creating staff schedules, and maintaining the provider's enrollment.
