

# Communities of Practice

February 2021

Health and Safety

Early Learning Resource Center (ELRC) Region 5 offers Communities of Practice (COP) for early learning professionals to discuss topics of interest, current trends in the field, and offer insight and inspiration to one another. In February, the COP virtual sessions will give providers the opportunity to discuss their health and safety successes, needs, and questions. Participants will be given the most current health and safety updates, information, resources, and professional development opportunities.
